MATH 522 Spring 2016 Syllabus,
Jan. 11 Edition*

Prof. Zachariah Etienne

Class meets MWF 10:30PM–11:20PM, ARM 203

Instructor Contact Information

• zbetienne *<at>* mix.wvu.edu
• Office hours:
  – Armstrong Hall 409C
  – Monday and Friday 2:00–3:00PM, or by appointment

Course Website

• http://math.wvu.edu/~zetienne/

Course Prequisites

• Good computer programming skills
• Good grounding in undergraduate mathematics

Text

• The lecture notes are designed to be self-contained, so there is no required textbook. However, one textbook is recommended:

Course Objective

• Partial differential equations (PDEs) are used to describe the dynamics of a wide variety of phenomena in many scientific and engineering contexts, though can be difficult or impossible to solve by hand. Motivated by such a wide variety of applications, this course will provide necessary training for analyzing PDEs and solving them on the computer, with particular focus on finite difference solutions to hyperbolic, parabolic, and elliptic PDEs.

Tentative Course Outline

• Finite-precision mathematics on the computer: roundoff error
• Classification of PDEs
• Finite difference approximations to derivatives, and its relation to interpolation; higher-order approximations.
• Truncation error and convergence
• Hyperbolic equations; explicit schemes; solving the wave equation

*Note that this syllabus is subject to revision, at the option of the instructor. If revised, the new syllabus will not become official until the instructor has distributed it to students at a regularly-scheduled course meeting.
- Stability and Consistency; Lax equivalence theorem
- Parabolic equations; solving the heat equation; exact solutions via Fourier series
- Implicit schemes; algorithms for solving matrices on the computer
- Elliptic equations; solving the Poisson equation

Grading

Grading will be based on the total number of points earned by a student. The points will be divided as follows:

- Homework Assignments (See Homework Policy below): 40%
- Midterm Exams (Fri, Feb 19 and Mon, Mar 14, normal class time/location): 35%
- Comprehensive Final Exam (Thu, May 5, 8:00AM–10:00AM, normal class location): 25%

Grading Scale

- A- to A+: 90—100%
- B- to B+: 80—89%
- C- to C+: 70—79%
- D- to D+: 60—69%
- F: Below 60%

Homework Policy

There will be a total of eight homework assignments given in this class, consisting of four coding assignments and four non-coding assignments. The homework policy is as follows:

- For coding assignments, homeworks will consist of two documents stapled together. The first document will contain handwritten or typewritten answers to each problem (with plots) in order (no Appendices). Any answers beyond what was asked will not be permitted. The second document, stapled to the back of the first, consists of a printout of all source codes written to answer each problem, again in order. Not following these instructions exactly will result in up to a 10% penalty, and homeworks without source code will not be accepted.
- For non-coding assignments, the use of calculators or any electronic computational aides is forbidden unless the homework problem states otherwise. Non-coding assignments must be handwritten or typewritten, and problems must be handed in in order, with a penalty of up to 10% if this instruction is not followed.
- Homework assignments must be carefully bound together using a single staple. Improperly bound or unstapled assignments will be assessed up to a 5% penalty.
- Students may not collaborate on homework assignments; all assignments must be completed individually. Written solutions or source code listings that are substantially the same will receive zero credit for all students involved.
- Full solutions will be due at the start of class on the due date; handing in parts of the assignment at different times is forbidden. Students are strongly encouraged to start early, or bugs may prevent them from handing in homeworks on time, and the standard homework late penalty will be imposed.
- Plots must have axes and all data series labeled accurately, or no credit may be given.
- Turning in homeworks on time is essential for doing well in this class, as homeworks are scheduled according to the lecture material. Late assignments will be penalized as follows:
  - Up to 48 hours late: 20% score reduction
  - 48–96 hours late: 50% score reduction
  - More than 96 hours late: 75% score reduction
Academic Dishonesty

The integrity of the classes offered by any academic institution solidifies the foundation of its mission and cannot be sacrificed to expediency, ignorance, or blatant fraud. Therefore, I will enforce rigorous standards of academic integrity in all aspects and assignments of this course. For the detailed policy of West Virginia University regarding the definitions of acts considered to fall under academic dishonesty and possible ensuing sanctions, please see the Campus Student Code. This Code may be found linked from the Office of Student Conduct web page: http://campuslife.wvu.edu/office_of_student_conduct. Should you have any questions about possibly improper research citations or references, or any other activity that may be interpreted as an attempt at academic dishonesty, please see me [the instructor] before the assignment is due to discuss the matter.

Inclusivity Statement & Accommodations

“The West Virginia University community is committed to creating and fostering a positive learning and working environment based on open communication, mutual respect, and inclusion. If you are a person with a disability and anticipate needing any type of accommodation in order to participate in this class, please advise me [the instructor] and make appropriate arrangements with the Office of Accessibility Services (304-293-6700). For more information on West Virginia University’s Diversity, Equity, and Inclusion initiatives, please see http://diversity.wvu.edu.”

Students requesting special accommodations are required to inform the instructor at least 48 hours in advance of a test.

Electronic Device Policy

During lectures and exams, cellular phones and other electronic devices (including but not limited to calculators, tablet computers, laptops, PDAs, MP3 players, Blackberrys) are not permitted, except with the consent of the instructor. All forbidden devices must be turned off before the beginning of the class period and placed out of sight (for example, in a backpack or handbag) until the class has concluded.

A student’s first violation of this policy during lectures will result in a verbal warning (one verbal warning per semester), and each subsequent violation even during the same lecture will result in a 1% deduction in the student’s overall course grade. Violations of this policy during exams will result in a zero grade on the exam and possible expulsion from the course.

Intellectual Property Notice

All course materials, including lectures, class notes, quizzes, exams, handouts, presentations, and other materials provided to students for this course are protected intellectual property. As such, the unauthorized purchase or sale of these materials may result in disciplinary sanctions under the Campus Student Code.
