Overview page x ..... xi
Preliminaries ..... xix
1 Axiom CPA cube and its consequences: properties (A)-(E) ..... 1
1.1 Perfectly meager sets, universally null sets, and continuous images of sets of cardinality continuum ..... 4
1.2 Uniformly completely Ramsey null sets ..... 9
$1.3 \quad \operatorname{cof}(\mathcal{N})=\omega_{1}$ ..... 11
1.4 Total failure of Martin's axiom ..... 12
1.5 Selective ultrafilters and the reaping numbers $\mathfrak{r}$ and $\mathfrak{r}_{\sigma}$ ..... 15
1.6 On the convergence of subsequences of real-valued functions ..... 17
1.7 Some consequences of $\operatorname{cof}(\mathcal{N})=\omega_{1}$ : Blumberg's theorem, strong measure zero sets, magic sets, and the cofinality of Boolean algebras ..... 21
1.8 Remarks on a form and consistency of the axiom $\mathrm{CPA}_{\text {cube }}$ ..... 27
2 Games and axiom CPA cube ..... 31
$2.1 \quad \mathrm{CPA}_{\text {cube }}^{\text {game }}$ and disjoint coverings ..... 32
2.2 MAD families and the numbers $\mathfrak{a}$ and $\mathfrak{r}$ ..... 34
2.3 Uncountable $\gamma$-sets and strongly meager sets ..... 36
2.4 Nowhere meager set $A \times A \subset \mathbb{R}^{2}$ intersecting continuous functions on a small set ..... 45
2.5 Remark on a form of $\mathrm{CPA}_{\text {cube }}^{\text {game }}$ ..... 48
3 Prisms and axioms CPA $\underset{\text { prism }}{\text { game }}$ and CPA $_{\text {prism }}$ ..... 49
3.1 Fusion for prisms ..... 54
3.2 On $\mathcal{F}$-independent prisms ..... 58
$3.3 \mathrm{CPA}_{\text {prism }}$, additivity of $s_{0}$, and more on (A) ..... 69
3.4 Intersections of $\omega_{1}$ many open sets ..... 73
$3.5 \quad \alpha$-prisms and separately nowhere constant functions ..... 78
3.6 Multi-games and other remarks on $\mathrm{CPA}_{\text {prism }}^{\text {game }}$ and $\mathrm{CPA}_{\text {prism }}$ ..... 88
$4 \quad$ CPA $_{\text {prism }}$ and coverings with smooth functions ..... 91
4.1 Chapter overview; properties $\left(\mathrm{H}^{*}\right)$ and (R) ..... 92
4.2 Proof of Proposition 4.1.3 ..... 97
4.3 Proposition 4.2.1: a generalization of a theorem of Morayne ..... 100
4.4 Theorem 4.1.6: on $\operatorname{cov}\left(D^{n}, \mathcal{C}^{n}\right)<\mathfrak{c}$ ..... 103
4.5 Examples related to the cov operator ..... 105
5 Applications of CPA $\underset{\text { prism }}{\text { game }}$ ..... 110
5.1 Nice Hamel bases ..... 110
5.2 Some additive functions and more on Hamel bases ..... 116
5.3 Selective ultrafilters and the number $\mathfrak{u}$ ..... 128
5.4 Nonselective $P$-points and number $\mathfrak{i}$ ..... 133
5.5 Crowded ultrafilters on $\mathbb{Q}$ ..... 139
6 CPA and properties ( $\mathrm{F}^{*}$ ) and (G) ..... 143
$6.1 \operatorname{cov}\left(s_{0}\right)=\mathfrak{c}$ and many ultrafilters ..... 145
6.2 Surjections onto nice sets must be continuous on big sets ..... 147
6.3 Sums of Darboux and continuous functions ..... 148
6.4 Remark on a form of $\mathrm{CPA}_{\text {cube }}^{\text {sec }}$ ..... 154
7 CPA in the Sacks model ..... 155
7.1 Notations and basic forcing facts ..... 155
7.2 Consistency of CPA ..... 160
Notation ..... 162
References ..... 165
Index ..... 172
